

Attention HogZilla Grinder Owner:

Complete safety, operation, and maintenance manuals were shipped with the grinder when new. Buyers who purchased a pre-owned grinder should have received the original owner's manuals for their grinder from the seller that they purchased the used grinder from. Owners and operators should locate that information and be sure to review and compare that safety, operation, and maintenance information prior to operation and prior to making any possible changes or updates that may be found in the new manual. Specific machine evaluations, repair services, and training assistance from a factory trained technician are available and recommended.

Please, also review your machine's safety decals to be sure that your machine's decals are up to date. Your machine's decals should include (but are not limited to) the following part numbers.

For Tub Grinders – *(Part numbers that are printed on the decals for identification.)*

Provided in 2009 Update

- 1014155
- 1001151A1
- 1001151A2
- 1001151A3

Provided in 2020 Update

- 1019629S

In addition to all CW Mill Equipment information, read and follow all other supporting information including separate manuals, documents, and decals related to the specific engine/motor, add-on machine options, supporting equipment, and individual components. NOTE: Special machine options, field changes, and other possible machine variances may be present in a way that may not match the available safety information. Review the actual machine and all available information closely. Contact CW Mill's grinder service department immediately if any variance is identified, and do not operate the machine until safe practices are fully known, understood, and properly implemented.

Be sure to review ALL safety and operation related details prior to use. When properly reviewed and confirmed to be correct for your machine, incorporate all applicable safety and operation information into the operation of the machine.

If you do not have correct safety and operation information or all of the safety decals listed above, please, contact CW Mill Equipment immediately with your machine's serial number.

If you need any other parts, other information, repair services, or safe operation training assistance, contact the grinder parts or service department by calling 785-284-3454.
